

Beginning April 25, 2024, TJX is offering shareholders the opportunity to submit a question for the Annual Meeting to be held June 4, 2024. If you would like to submit a question, please do so here. TJX expects to respond to questions during the Annual Meeting that are relevant to meeting matters and as time permits. **You will not have the opportunity to submit questions during the Annual Meeting.**

If you would like to submit a question, please note the following guidelines:

- We invite shareholders to submit questions early.
- Each shareholder may submit one question. To allow us to answer as many questions from as many shareholders as possible during the Annual Meeting, we may disregard additional questions if a shareholder submits more than one.
- When we respond to a question during the Annual Meeting, we will first read the question aloud. We encourage shareholder questions to be brief to allow us to respond to as many questions as we can during the time available.
- While we will strive to respond to as many questions as possible during the time available, we will prioritize responding to questions submitted by shareholders who identify themselves by name.
- If we receive multiple questions that are substantially similar, we may group them together and respond collectively to such questions during the Annual Meeting to avoid repetition.
- We reserve the right to edit profanity or other inappropriate language and to exclude questions that are not relevant to meeting matters.
- **The deadline to submit questions is 5:00 pm EDT on Friday, May 31, 2024.**

We plan to post the questions we receive that adhere to the above guidelines, along with our responses, to the Annual Meeting website at www.virtualshareholdermeeting.com/TJX2024 for viewing during the Annual Meeting. You will need the 16-digit control number found on your Notice of Internet Availability, proxy card, or voting instruction form to log-in to the Annual Meeting website and view the posted questions and answers.

If during the Annual Meeting we are unable to respond to a question that you submit here, we encourage you to contact our Global Communications team at 508-390-2323.
